

Medical tourism

Medical tourism is a new concept of modern public health service. Being out of opportunity to solve medical problem inside his own country, a patient chooses the country, the doctor and the clinic where he can be offered with the newest medical survey and treatment.

In order to attract a stream of foreign citizens, from Asian countries particularly, State autonomous healthcare institution of Kemerovo region “Novokuznetsk municipal clinical hospital №1” has all required resources, such as a high level of adequate medical equipment and qualified medical staff.

For almost ninety years the medical organization has been providing the population of Novokuznetsk and Kemerovo region with highly qualified medical assistance. It has been a scientific and practical base for the “Advanced training medical institute of Novokuznetsk” for more than sixty years. “Novokuznetsk municipal clinical hospital №1” is considered to be a flagship of regional medicine. Highly qualified specialists, sixty candidates and doctors of medicine work there.

The specialists of “Novokuznetsk municipal clinical hospital №1” are acknowledged leaders in the promotion of organ-preserving and less traumatic treatment modes.

The medical staff of the hospital achieved considerable results in cardiology, surgery, urology and traumatology. The first clot extraction in Kemerovo region, performed on a patient with ischemic stroke, and a number of new technologies such as carotid artery stent procedure, abdominal aorta endoprosthesis, thyroid gland embolization and embolization of hysteryomyoma arteries are among them.

Besides that, systematic work on introduction of the international quality standard in management ISO 9001:2015 needed for the medical process optimization has been being put into effect for last eighteen months. It is done as a matter of patient’s opportunity to get qualitative medical assistance and high level of service and to be maximally satisfied with rendered medical care.

Among the most perspective directions for the introduction of medical tourists are the next ones:

- Highly technological medical assistance for myocardial ischemic treatment and the therapy of carotid artery stenosis;
- Rendering of ophthalmological services for cataract and glaucoma;
- Operative treatment of oncological diseases of gastrointestinal tract;
- Surgical interventions in locomotors system.

Gynecology and urology are still demanded directions. For example, reconstructive plastic operations on pelvic organs and minimally invasive organ preserving operations for gynecological disorders are available for female patients in the gynecology unit of the hospital.

The medics of “Novokuznetsk municipal clinical hospital №1” are ready to offer specialized operative treatment of osteochondrosis and tumors of cerebrospinal system and peripheral nerves.

Besides that, the surgical department № 3 which is unique in the southern Kuzbass works on the base of Novokuznetsk hospital and specializes in plastic surgery. Nonresident guests can undergo operative treatment of obesity there. It's gastric minishunting, a laparoscopic longitudinal partial gastroectomy.

Blepharoplasty, mammoplasty, liposuctioning of thighs, nonoperative and operative treatment of varix dilatation are also available for all comers.
